

KM Conference 2020 (Virtual)

Themes: Knowledge Management, Cybersecurity, Learning, and Information Technology

<http://www.iiakm.org/conference/>

Online Conference Social: KM Pandemic Views

Dr. Michelle M. Ramim¹ and Dr. Shonda Brown²

¹ Nova Southeastern University, USA

² Middle Georgia State University, USA

Given everyone is dealing with the pandemic at home, we thought it would be fun to share some pictures on your view of the Pandemic using the following themes;

1. A view from my window
2. You and/or your family's face mask look
3. You and/or your family doing sport at home
4. Schooling from home

Interpret the theme in any way you see fit. When taking photos please do not endanger yourself or others, take unnecessary risks, or infringe any laws. Please include the title of theme in the subject line of your email message, add your name as well as a caption such as **who, what, where, and when**. You can enter up to three images. Pictures should be sent as Jpeg files. They shouldn't be larger than 5Mb each and ideally much smaller: around 1Mb is fine, or you can resize your pictures to 1,000 pixels across and then save as a Jpeg.

Please email your pictures to KMSocial@iiakm.org by Friday June 19th, 2020. We look forward to showcasing the pictures during the social breaks.

Michelle M. Ramim, Ph.D. is an adjunct professor at NSU KPCOM, Department of Health Informatics, Biomedical Informatics Program, and College of Computing and Engineering (CCE), Fort Lauderdale, Florida, USA. She has extensive experience as an information technology (IT) consultant. Her current research interests include healthcare IT, cybersecurity and crisis management, ethical and legal aspects of computing, as well as ethical decision-making. She completed her Ph.D. in Information Systems at Nova Southeastern University in the area of ethical decision making in computing.

Shonda Brown, Ph.D. is a manager at a Fortune 500 company and part-time professor at the School of Information Technology for Middle Georgia State University. Dr. Brown's research interests include information security and privacy. Moreover, she received a Bachelor's degree in Information Systems from Howard University, Master's degree in Information Systems from Drexel University, and Ph.D. in Information Systems with a concentration in Information Security from Nova Southeastern University.
