Conference Workshop

AI on the Ground: What's Actually Changing in KM and Cybersecurity?

Dr. Julita Haber¹, Dr. Christiaan Maasdorp²

¹ Associate Clinical Professor, Fordham University, USA

² Senior Lecturer, Stellenbosch University, South Africa

Workshop Overview:

At our Knowledge Management (KM) conference each year, experts in KM, cybersecurity, organizational learning, and information systems gather to discuss the positive and negative impacts on these fields as they adopt Generative Artificial Intelligence (GenAI). In this workshop, we will discuss the realities of changes in our different domains and the future of KM and cybersecurity, making connections through individual reflection, pair discussion, sharing in groups, and facilitated feedback in plenary. Together, we will make sense of what the present lived realities points to regarding the future of our fields and what the big questions are that will be our task to investigate.

About the Workshop Facilitators:

Julita Haber, Ph.D. is an associate clinical professor in the Leading People and Organizations area at the Gabelli School of Business at Fordham University. Her current teaching includes principles of management, innovation and resilience, operations, and foundations of consulting. Her research interests focus on organizational behavior and pedagogy. In particular, she studies impressions of competency and the adverse effects of the fear of appearing incompetent in the workplace. Julita also implements innovative pedagogical methods. She developed a fitness-integrated learning (FIL) approach that engages students in physical exercise when learning in class. Prior to academia, her career spanned 20 years of experience in IT and business, including management consulting at Deloitte and PwC.

Christiaan Maasdorp, Ph.S. is a Senior Lecturer at the University of Stellenbosch, in South Africa, and study director of the postgraduate programs in Information and Knowledge Management. He lectures on knowledge management, organization theory, and the information society. His research interests are knowledge risk, conceptual aspects of knowledge management, and the role of knowledge and technology in organizations.
